If these descriptions in any case are contradictory, this description is valid.

Function

This special program has functions, special for car weighing.

General

The program requires that four scales (channel 1-4) is used for separate weighing of each wheel.

In the main window, the weight for each wheel, each side, each shaft and the total weight (sum of all four channels) is shown

Main window:

2006-09-24 19:07	
Left front:	300,1 kg
Right front:	310,2 kg
Left rear:	320,3 kg
Right rear:	325,4 kg
Left side:	610,3 kg
Right side:	645,7 kg
Front shaft:	620,4 kg
Rear shaft:	635,6 kg
Total weight:	1256,0 kg
-----	-----
-----	-----
-----	-----
-----	-----
-----	Chan. 1-8

All weight values indicates 'Unstable' weight with red color, and 'Good zero' with green color.

Pressing the 'TARE' button in this window causes a tare command to all four channels. If all channels were able to perform a tare, the result of the command is indicated in the net value that should change to zero and a 'N' shown after the weight value.

Pressing the 'ZERO' button in this window causes a zero command to all four channels. If all channels were able to zero (the gross weight) this is indicated in the gross value that should change to zero.

Pressing the PRINT button in this window causes all weight values to be sent to one (or both) serial ports that is configured for printer output (Std Serial). A report is written similar to the main window.

By pressing the soft key 'Chan.1-8' (F5) a window opens where all the separate channels are shown in the same way as in a normal weight indicator. In the opened window there is a soft key 'Main view' (F1) that return the display to the main window.

Parameters

The menu system is reached with the 'Info' button when the indicator displays the separate channels (not in main window).

From 'Main window', press key 'Chan.1-8' and then key 'Info' (or key F11 on a connected USB keyboard).

Added or changed menus and parameters.

Menu 'Communication/Serial Com./COMX:Mode

This menu has been extended with a new choice '**Std Serial**' to be able to send data to a connected printer.

Menu 'Inputs/Inputs Slot X/Input XX Use

This menu has been extended with a new choice '**Print**' in order to be used as an external print command.
