

Replacement Electronics for Sawmills

Nobel Weighing Systems

A Brand of VPG Weighing Systems

It's Time to Upgrade Your Control System

Nobel Weighing Systems is now offering users of its sawmill servo electronics the opportunity to upgrade their control systems without having to change the host PLC system. The replacement control system is based on our latest microPOS4 technology and features the future-proof ability to communicate via PROFIBUS, Ethernet, and other field buses. The new upgrade opportunity is intended to minimize downtime while providing savings over the cost of maintaining legacy control systems.

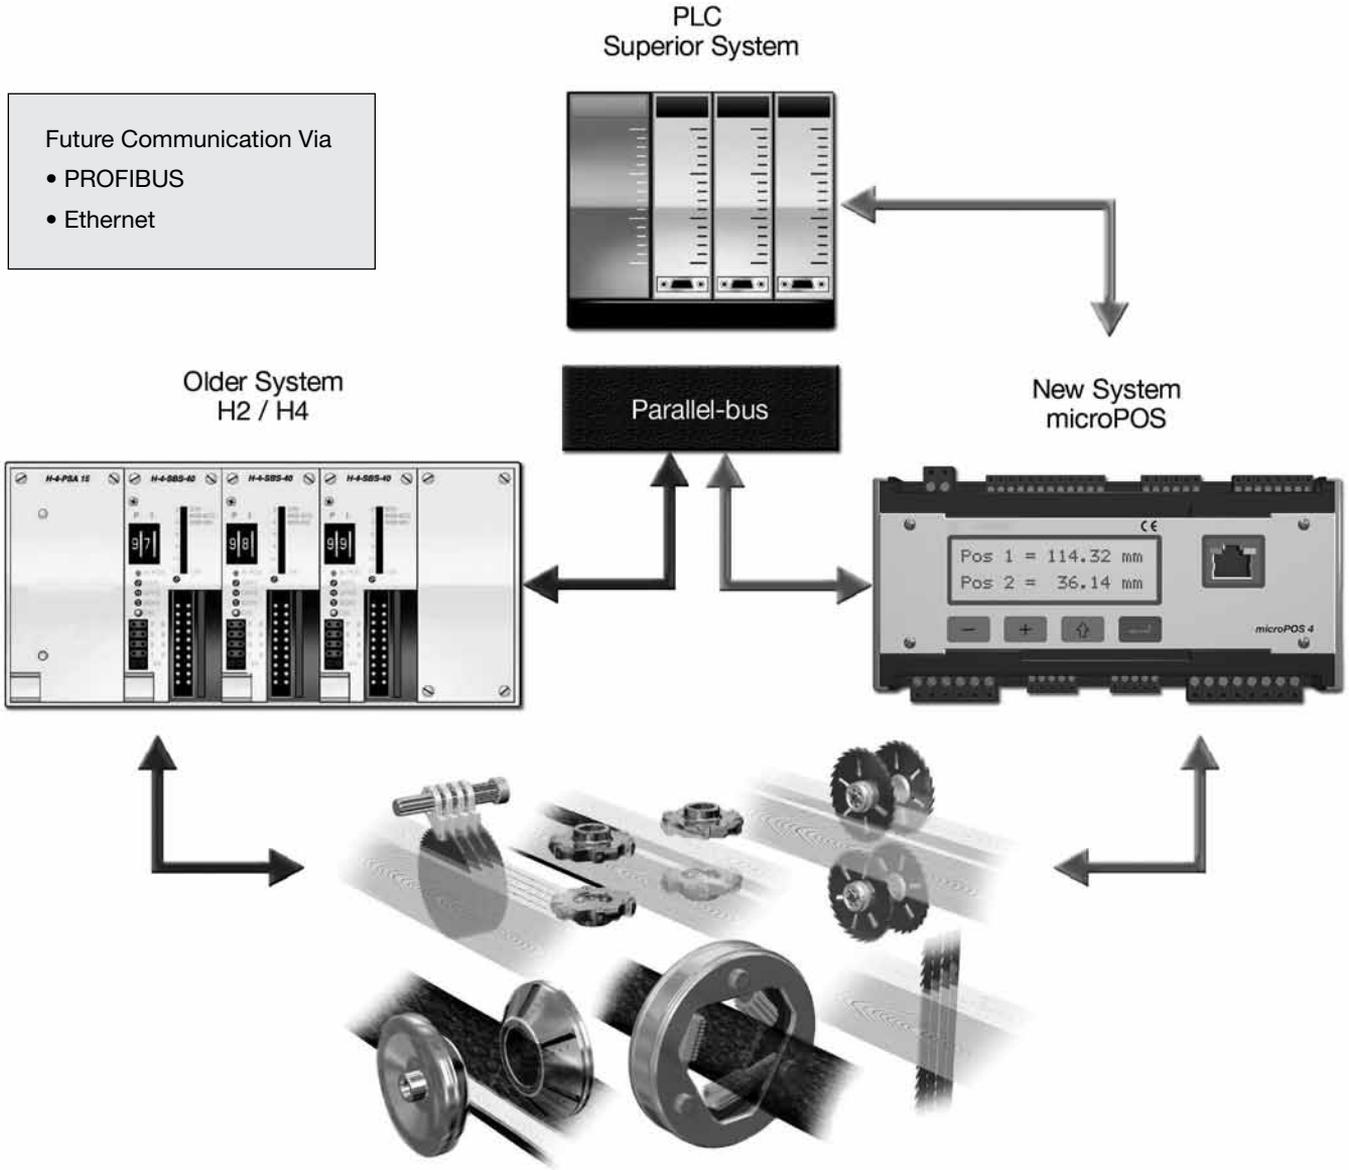

The following Nobel Weighing Systems are eligible for the control system upgrade:

- H-2 / BORE (1975)
- H-3 (1981)
- SBS (1984)
- SBS-30 (1988)
- SBS-40 (1992)
- microPOS

For older systems featuring servo cylinders with external position transducers, it will be necessary to replace the servo cylinders with new components having integrated positioning transducers.

Nobel Weighing Systems service engineers are available to participate in the installation of the new control system and to consult on bringing the new system on line with minimal impact on plant production.

It's Time to Upgrade Your Control System

Future Communication Via

- PROFIBUS
- Ethernet
